ELECTRIC KNIFES STERILZER

The electric sterilizer "open model" stainless steel AISI 304 allows sterilization through hot water at C° 85 of the cutlery, and cripple shears in use in alimentary industries.

Customized versions available on request, also for electric saws, cleavers and special equipment

The sterilizer is arranged to be located at side of the sinks, work desks or a wall desks. Equipped with a knife holder upper grill keeps the blades down to a 85 C° in water.

The structure is fairing against the risk of burns.

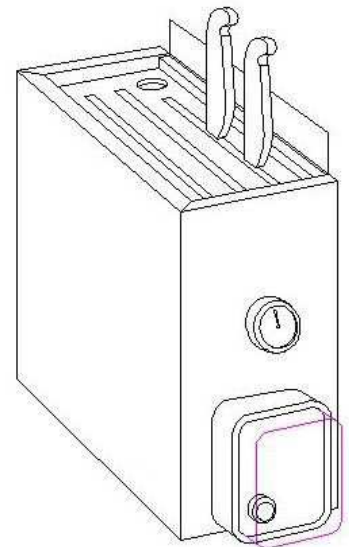

The device is equipped in the lower part of:

- Hot water loaded tap
- Water discharge tap
- Overflow drain

It is equipped with a thermometer that displays the water temperature and an operating light.

An additional grid is placed to protect the electric heating element.

The construction takes place according to the rules of the art in compliance with the current CEI sanitation and construction regulations.

Technical characteristics:

Dimensions	320 x145x390 mm of h
Maximum dimensions	400 x145x480 mm of h
